

Abdelrahman Eltabaa

QC Software Engineer

012-126-37455 | abdo.tabaa5@gmail.com | Cairo, Egypt

LinkedIn | GitHub | Portfolio

Professional Summary

Computer Engineering graduate and QC Software Engineer with a strong foundation in **Software Testing, Quality Control, and Agile/Scrum methodologies**. ISTQB CTFL v4 certified, with hands-on experience in **Manual Testing, API Testing, Database Testing & Automation**. Skilled in **defect tracking, UI/UX testing**, and utilizing modern **project management tools** for efficient **test case management**. Passionate about **Shift-Left testing** and delivering high-quality, fault-tolerant software through effective collaboration and continuous improvement.

Professional Experience

Quality Assurance Engineer

iNNOTECH

Sep 2025 – Present

On-site

- Executed comprehensive manual, functional, and regression testing for enterprise business systems (CRM, HR, Financial).
- Architected detailed test cases and scenarios mapped directly to business requirements.
- Conducted API testing (Postman) and systematically tracked software defects using modern management tools.
- Collaborated within an Agile/Scrum environment to verify complex business workflows and data integrity.

Education

Tanta University

Bachelor of Engineering, Computer Engineering

Jun 2026

▷ Cumulative GPA: Excellent

Certifications & Diplomas

ISTQB® Certified Tester Foundation Level (CTFL v4) – ID: 260422018

Core Focus: Testing Fundamentals & Principles (v4 Updates), Agile Testing & SDLC, Static & Dynamic Testing Techniques, Test Management, and Defect Lifecycle.

Software Testing & Quality Assurance Diploma (6-Months)

Route Academy

Core Focus: Manual & Agile (SDLC, STLC, Bug Reporting), Automation & API (Postman, Java OOP, Selenium, TestNG), Tools (Jira, SQL), Advanced (Mobile & Performance Testing).

Frontend Development Diploma – Angular (6-Months)

Route Academy

Core Focus: REST APIs, JavaScript, Angular Framework, HTML, CSS, SPAs.

Skills

- Test Management & Agile Tools:** Jira, Zephyr (Scale/Squad), Agile/Scrum Frameworks, Workflow Management, Bug Tracking.
- Testing Types & Methodologies:** Manual Testing, Functional Testing, UI Testing, Regression Testing, Smoke Testing, Shift-Left Testing.
- Automation & Testing Frameworks:** Selenium, Cucumber, RESTful APIs, TestNG.
- API & Database Testing:** Postman, Newman CLI, API Automation, Mocking Services, SQL.
- Programming & Web:** Java, Angular, JavaScript, HTML, CSS, C++, Python.
- Test Artifacts:** Test Cases, Test Scenarios, Bug Reports, Requirement Traceability Matrix (RTM).
- Concepts:** SDLC, STLC, Defect Lifecycle.
- Soft Skills:** Team Collaboration, Attention to Detail, Analytical Thinking, Problem Solving, Communication Skills.

Projects

Graduation Project: Tegy - Complete Tourism Platform

[Live Platform] | [LinkedIn Demo]

- Overview:** A comprehensive tourism ecosystem connecting travelers with activity organizers across Web, Mobile, and Admin dashboards.
- QA & UI/UX Role:** Designed intuitive interfaces using Figma. Conducted exploratory testing, executed manual test cases, reported bugs, and verified fixes alongside the development team.

End-to-End API Testing & Automation Project

[LinkedIn Demo]

- Scope & Lifecycle:** Conducted complete CRUD lifecycle testing across a multi-collection ecosystem, including a Restful Booker booking system and a Library API.

- **Automation & Scripting:** Authored robust test scripts and assertions for schema accuracy, response integrity, and validation codes, achieving a 100% Pass Rate.
- **Dynamic Data Handling:** Built scalable test collections using Pre-request scripts and dynamic environment/collection variables to seamlessly pass authorization tokens and record IDs.
- **Newman CLI & Reporting:** Streamlined testing execution by moving to the command line using Newman CLI to simulate CI/CD readiness, generating detailed professional HTML Summary Reports.
- **Mocking:** Integrated Mock environments to simulate live backend API responses, ensuring thorough independent test coverage.

OpenCart E-commerce Website - Agile Testing Project

[LinkedIn Demo]

- **Agile Integration:** Applied Agile and Scrum methodologies within a collaborative team environment to test the OpenCart website, actively managing Epics, User Stories, and Tasks.
- **Test Management (Zephyr):** Gained practical experience designing, writing, and executing test cases, alongside managing test cycles and test execution utilizing Zephyr.
- **Defect Tracking (Jira):** Navigated the defect lifecycle by creating, tracking, and documenting software bugs through Jira, improving overall bug reporting and technical communication.
- **Release & Monitoring:** Monitored sprint progress and project release activities, gaining valuable exposure to real-world software quality assurance practices.

Guru99 Bank - Manual Testing Project

- Completed full Manual Testing cycle from SRS Analysis to Regression Testing.
- Designed, executed, and documented detailed Test Cases and Test Scenarios.
- Created and maintained Requirement Traceability Matrix (RTM).
- Conducted Test Execution & Defect Reporting with clear bug documentation.
- **Deliverables:** Test Cases, RTM, Bug Reports (Project Documentation | LinkedIn Post).

Frontend & Software Development Projects

[ANGORA GitHub Repository]

- **Web Development:** Built the ANGORA web application and Single Page Applications (SPAs) utilizing Angular, HTML, CSS, and JavaScript.
- **Testing Impact:** Deep knowledge of DOM structures and web architecture significantly enhances UI/UX testing accuracy and enables highly efficient element identification (locators) for test automation tools.
- **Programming Logic:** Implemented structural software solutions using C++ and Python, establishing a strong technical foundation highly beneficial for white-box testing and scripting automation frameworks.

Training & Courses

Software Testing Diploma (6 Months)

Route Academy

- **Manual & Agile:** SDLC, STLC, Manual Testing, Test Case Design, Bug Reporting, ISTQB Prep, Agile (Scrum).
- **Automation & API:** API Testing (Postman), Java Programming & OOP, Selenium WebDriver, Cucumber, TestNG.
- **Tools & Technologies:** Jira, Trello, Database Testing (SQL), Git, GitHub, Web Fundamentals (HTML, CSS, JS).
- **Advanced & Projects:** Mobile App Testing, Performance Testing (JMeter), Security Testing (OWASP), Workshops & Real Projects.

Jira & Zephyr Practical Workshop

Route Academy

- Intensive practical workshop focusing on test case design, sprint planning, project workflow restrictions, and Agile team collaboration.
